

WHAT IF...

Ohio's Energy Renaissance Never Actually Happened?

Ohio helped make the American energy renaissance possible, with thousands of new jobs created and millions of dollars generated for state and local communities.

But if some leading political figures and interest groups had their way, Ohio's energy renaissance would have never happened. In a new report, we take them at their word and quantify what the impacts would have been had the policies they supported been adopted.

"I'm going to pledge to stop fossil fuels."

Hillary Clinton
Presidential candidate

"To hell with the fossil fuel industry."

Bernie Sanders
Former presidential candidate

THEY BELIEVE WE WOULD BE BETTER OFF WITHOUT THE ENERGY RENAISSANCE. BUT THEY'RE WRONG.

A NEW REPORT SHOWS THAT IF THE ENERGY RENAISSANCE NEVER HAPPENED, OHIO WOULD HAVE LOST:

114,500

JOBS

\$9.9 BILLION

IN ANNUAL GDP

\$5.8 BILLION

OF LABOR INCOME

ACCORDING TO OUR ANALYSIS:

"Ohio's economy is on track to continue its expansion, with significant future growth expected to come from oil and natural gas development."

Report: What if America's Energy Renaissance Never Actually Happened? p. 38

"If energy prices had remained at their pre-renaissance highs, [Ohio's iron and steel] sector would have been placed at immediate risk."

Report: What if America's Energy Renaissance Never Actually Happened? p. 38
